

FOR IMMEDIATE RELEASE

### **Distribution Agreement with ACES Systems**

Pilot John International (PJi) announces a new distributorship agreement with ACES Systems. PJi is pleased to offer proven vibration analysis and balance solutions to our customers for tracking and balancing their aircraft. The product line includes systems for aircraft engine fan and turbine balance, helicopter rotor track and balance, vibration analysis, and dynamic propeller balance. ACES Systems' mission is to provide simple solutions to improve aircraft safety, performance and longevity.

ACES Systems has been a knowledge leader in the fixed-wing and helicopter industry for more than 40 years providing vibration analysis applications and balancing solutions. Their product line also includes the Viper II, Viper 2E, Cobra II, Model 2020PL ProBalancer Analyzer, Model 1015 ProBalancer Sport, TraX, and Model 1752B Jet Engine Data Acquisition Module. ACES Systems' versatile products are compact, offer more functionality and accuracy, improve engine performance and take-off, reduce passenger discomfort, and extend component life.

"We are excited to offer the ACES Systems product line, trusted by OEMs and major airlines. Stocking ACES Systems provides our loyal customers with their crucial maintenance requirements and builds on our reputation for supporting their needs," said John Werner, PJi President, and CEO.
